

Yagna Patel

GTM & Product · Customer Success · AI-native

thisyagna@gmail.com · [linkedin.com/in/yagna2652](https://www.linkedin.com/in/yagna2652) · github.com/yagna2652

I own customer relationships end-to-end — from demo to integration to production — and bring market intelligence back into GTM and product decisions. I've helped take a **YC-backed** AI startup to **100 users**, co-founded a startup to first revenue and an acqui-hire, and built automation systems that drove **>10x revenue growth**. I operate at founder velocity and thrive where technical curiosity meets customer impact.

EXPERIENCE

Memory Store · YC P26 · 4-person team2025 – 2026

Product & GTM Lead

- Owned customer relationships end-to-end — ran demos, managed onboarding, and took users from API key to working product; grew to **100 users** and **Y Combinator (P26)**.
- Shipped core MCP server (Record, Recall, Overview) and authored reference integrations that unblocked early adopters on LLM-based memory workflows.
- Acted as voice of the customer: relayed precise model feedback and integration failure patterns to the engineering team, closing the loop with users after each fix.

Etheca · Self-founded · with one co-founder (ex-Ultrahuman)2024 – 2025

Co-founder

- Built an AI tool that watches your screen, narrates workflows, and generates SOPs for AI handoff — designed, demoed, and validated with real customers.
- Ran customer discovery and outreach end-to-end; surfaced recurring patterns across accounts to sharpen product positioning and GTM sequencing.
- Stood up a services arm, onboarded **Ultrahuman as first paying customer at \$500 / mo recurring**, and received an **acqui-hire offer from a Thiel Fellow** before registering the company.

Ultrahuman · 4-person growth team18 months

Growth

- Built end-to-end GTM automation: ingested creator content via API, auto-transcribed with AI, generated personalised outreach, and scored relationships with a proprietary tool — replacing manual research with one click.
- Tracked competitive landscape and surfaced market intelligence across **5,000 prospects / month**; brought account-level patterns directly into GTM strategy — **zero headcount increase**.
- Monthly revenue **\$250K → \$2.9M (>10x)** · DRR **+170%** (Oct – Dec) · **\$6.8M** direct website sales · **\$414K** creator-driven Amazon sales.

SKILLS

Growth	GTM strategy, customer success, market intelligence, competitive landscape mapping, growth ops
Product	User empathy, demo storytelling, API integrations, LLM tooling, voice of customer
Systems Thinking	Breaking down complexity, process design, AI-native workflow automation
